

25 Sep 2018

I Christopher started having severe pain on my left shoulder and there was also swelling while I was sailing. I was immediately brought back by my company who asked me to meet Dr Shashank Joshi (Brain and Spine Surgeon) on 23rd July 2018. I met Dr Shashank Joshi who thoroughly examined me and asked me to do an MRI scan of Cervical Spine with Screening of Left Scapular region. Dr Shashank Joshi reviewed my MRI and assured me that there was nothing to worry and no surgery is required. I had to take rest and some medications. After 3 weeks he asked me to see a physiotherapist to strengthen my neck muscles.

Dr Shashank Joshi always took the time to answer all my queries. Dr Shashank Joshi is extremely thorough and he cares about his patients and their health. Today I am feeling much better is because of Dr Shashank Joshi's medical treatment. A Big THANK YOU to Dr Shashank Joshi really Appreciate Everything. I will always recommend Dr Shashank Joshi to my family and friend's.

Mr. Christopher
